

SAFETY POLICY

EMIT GROUP is committed to its activities and services to implement all the measures and proceedings necessary to protect the workers / employees of the organization within of the duties / tasks / responsibilities attributed.

The Management believes that everyone must operate in full compliance with the procedures prescribed by the management system for health and safety in the workplace prepared, each for his own competence and attribution, as the individual and collective security is a common good to be safeguarded.

For the EMIT GROUP, pursuing this goal means:

- **consider risk assessments based on the activities performed general and specific, which make it possible to determine their nature and relevance;**
- **comply with current legislation on safety;**
- **commitment to prevention, favoring behaviors and analysis to identify causes of accidents, potential accidents, and almost accidents;**
- **commitment to involving human resources in related issues, through the appropriate tools provided by the system;**
- **make available the resources and tools necessary to ensure that the identified management system can be effectively applied by the organization in terms of safety at work and are defined and the expected SSL goals and related programs are distributed within the company of implementation;**
- **provide for the training of their collaborators, involving them for the achievement of shared improvement objectives;**
- **commit to recognizing system results as an integral part of business management.**

We therefore ask for the functions in charge of giving the widest possible distribution of the following document to all employees / collaborators of the organization.
